Let Us Get Your Business On Schedule

Robinson Ventures offers a personal approach to obtaining your GSA Schedule Contract.

We will outline your goals and objectives and develop a customized approach for your organization. We will work closely with your company to completely understand the products and/or services you wish to offer to the government. After determining the right schedule to apply for, we thoroughly research your schedule competition and assist you in developing competitive pricing structures and a profitable government discounting plan. All contract terms are explained and contract specifications are agreed upon. We will review your commercial practices, warranties, guarantees and other terms and conditions for your product or service offering.

Your proposal will be written in the way that best represents your company and offering. All government negotiations, government requested proposal revisions and GSA submittals are included in our contract writing package. We make it easy to get on schedule!

After contract award, there will be monthly and quarterly reports, IFF Fee audits, marketing opportunities and orders to fill. Robinson Ventures can take care of all the procedures that come with a

GSA Contract Schedule award. We offer various levels of contract maintenance packages designed to suit every need. We will train your employees, maintain the contract for you, or both. We also provide marketing services, contract auditing, and general contract consulting.
